Career Summary

I'm a Kathmandu University graduate and an ML/AI engineer enthusiastic about building intelligent, scalable, and practical AI solutions. I focus on cutting-edge developments in AI, including Agentic AI systems, Retrieval-Augmented Generation (RAGs), Model Context Protocols (MCPs), and modern LLMs such as GPT-4, Claude, LLaMA, and Mistral. I thrive at the intersection of machine learning, automation, and real-world deployment—helping businesses transform ideas into robust AI-driven solutions.

Education

Kathmandu University

Undergraduate Certificate in Computer Engineering

Dhulikhel, Kavre

Aug 2016 – Aug 2020

Seabird Int. College

Higher Secondary School Certificate

Madhyapur Thimi, Bhaktapur

May 2014 – Mar 2016

Experience

S.D.S. Software Development Nepal

Machine Learning Engineer

Kathmandu

Jan 2024 – ongoing

- Built, deployed, maintained, and improved production-grade machine learning models.
- Specialized in **healthcare AI solutions**—automating claims and document workflows.
- Helped design infrastructure for automating healthcare operations, leveraging OCR and NLP models.
- Supported scaling of ML systems with automation platforms and cloud deployment.

Prixa Technologies

ML Engineer

Lalitpur

Dec 2020 – Dec 2023

- Designed and deployed AI models in production using cloud services (AWS, PaperSpace, GCP).
- Led projects implementing LLMs and generative models for content personalization.
- Integrated AI capabilities into web applications using FastAPI.
- Built data pipelines for ML workflows with web scraping, automation, and orchestration tools.

Projects

Nepali TTS Project: Nepali TTS Project

A real-time Nepali text-to-speech project utilizing advanced ML models.

- Roles: Data collection, preprocessing, model development, training, and deployment.
- Integrated into multiple Nepali news websites (e.g. Annapurna Post, ThahaKhabar).

News Talk: Android App & iOS App

Personalized news recommendation app powered by ML.

- Implemented recommendation algorithms using user interaction data.

SIKKA: Blockchain Project (SIKKA)

Digital voucher assistance platform built with Hyperledger Fabric blockchain.

- Deployed on AWS; distributed digital tokens to beneficiaries.

Other Projects.....

- **Nepali OCR System:** Built OCR pipeline for digitizing Nepali documents.
- **RAG-based Chatbot:** Implemented retrieval-augmented generation with vector databases.
- **Gradio ML Demos:** Built interactive ML model demos using Gradio.
- **n8n Automations:** Automated ML workflows, integrations, and data pipelines.
- **AI Image Generation:** Created diffusion-based generative image models.

Technical Skills

Machine Learning: Deep learning, LLMs, RAGs, Agentic AI, MCPs, NLP, CV

Libraries: PyTorch, Hugging Face, NumPy, Pandas

OCR Specialization: Tesseract, EasyOCR, custom OCR pipelines

ML Demos: Gradio, Streamlit

Automation: Selenium, Airflow, Celery, n8n

Cloud Services: AWS, GCP, PaperSpace

API Development: FastAPI

Database: PostgreSQL, SQL, Vector DBs (FAISS, Pinecone)

Visualization: Metabase, Tableau

LLMs: ChatGPT, Claude, LLaMA, Mistral, VLMs

Audio/Video: Audacity, Adobe Premiere Pro, OBS

Interests

I'm passionate about advancing intelligent agents powered by LLMs and agentic AI frameworks that can reason, act, and interact with tools. I actively explore RAG systems, multimodal AI, and MCPs to bridge gaps between raw data and usable intelligence. Beyond research, I enjoy building user-friendly AI apps and automation systems that bring state-of-the-art ML into practical, real-world use cases.
